

Repayment Options

Choose from 8 flexible payment plans with terms ranging from 6 to 84 months in duration. Plans are available with 100% financing (including software only). End of lease options include the right to purchase equipment for its then Fair Market Value, 10%, 5%, 1% of original equipment cost and \$1.00 (municipal only).

Some of our most popular lease plans other than the standard level payment structure include the:

*** Technology Upgrade Lease**

The Lessee is able to upgrade the existing equipment during the initial lease term so as to avoid equipment technological obsolescence.

Security Deposit Plan

The Lessee makes an upfront security deposit equal to the end of lease option. Thus, for most hi-tech equipment, the payment can be expensed for tax purposes, however the equipment ownership transfers at the end of the lease term upon the Lessee exercising the option without further payment as the deposit is automatically applied.

Deferral Payment Plan

The Lease is initiated by the required deposit and/or advance rental payments followed by payments of \$50 each month for the deferral term (3-6 months). Subsequently, the Lessee makes full payments for the remaining term of the lease.

Step Up Plan

The Lease is initiated by the required deposit and/or advance rental with reduced payments at onset of the lease (6 months upward). After the step up period, payments increase annually or for the remaining term of the lease.

* Vendor participation required.
